If more than one search is submitted, please prioritize searches in order of need.

Provide the PALM Bib page or the following: (Total Pages including this sheet: 5)

Title of Invention: _____ Bib Data Sheet Attached _____

Inventors (provide full names): _____

Earliest Priority Filing Date: December 1, 1999

Requested attachments:

- If possible, provide the cover sheet, the IDS, examples, or relevant citations, authors, etc, if known.
- Please attach copies of the parts of this case that help explain or are most pertinent to this search. Examples are: abstract, background, summary, claim(s) [not all of the claims].

Abstract, Summary of the Invention, and claims 1-5 included.

The claimed or apparent novelty of the invention is:

Creating an annuity or trust. Funding the annuity or trust with stock options (with a given value).

Paying out the annuity or trust (obviously at periodic rates) with the stock options.

The valuation of the stock options are made at payment of the annuity or trust..

If this is found, please contact me to further limit the search.

This search should focus on:

(Also include keywords or synonyms)

An annuity or trust with regular payments out. The payments out are in the form of stock options.

Cash may be spliced into the payment to keep the annuity at a certain level.

If you have any questions or need help with keywords, please feel free to contact me.

Gifting compensatory stock options

Harrison, Robert E

Tax Adviser v29n8 PP: 526-528 Aug 1998 CODEN: TAADDJ ISSN: 0039-9957

JRNL CODE: TAD

DOC TYPE: Journal article LANGUAGE: English LENGTH: 3 Pages

WORD COUNT: 1595

ABSTRACT: A recent IRS ruling, Rev. Rul. 98-21, casts a cloud over the ability of taxpayers whose compensatory options are not yet exercisable to make a gift of their options at a minimal transfer tax cost. The inability to be certain of the gift tax consequences of such a gift will undoubtedly deter many taxpayers from using this technique. Moreover, it remains to be seen whether or not the Service will apply its theory to gifts made prior to the issuance of the ruling.

TEXT: Taxpayers fortunate enough to have been granted compensatory stock options have a unique opportunity to use these options to transfer the anticipated appreciation to future generations at little or no gift/estate tax cost. Unfortunately, a recent IRS ruling casts a cloud over the ability of taxpayers whose compensatory options are not yet exercisable (i.e., not vested) to make a gift of their options at a minimal transfer tax cost.

Income Tax Consequences

The income tax consequences of nonqualified options that do not have a readily ascertainable fair market value (FMV) at the time of grant are generally set forth in Regs. Sec. 1.421-7. Unless the specific nonqualified option is actively traded on an established market, it will almost always be considered as not having a readily ascertainable FMV for income tax purposes. The grant of such a nonqualified option does not cause income recognition. If the option is exercised by the grantee or otherwise disposed of in an arm's-length transaction, the grantee will have ordinary compensation income in the following amount:

1. If the option is exercised, the excess of the FMV of the stock received over the exercise price; or
2. If the option is transferred in an arm's-length transaction, the amount or FMV of the consideration received.

In the case of exercise, the grantee's holding period for the stock received begins on the date of exercise; the stock's basis is its FMV at that date.

If the option is transferred in a transaction not regarded as arm's-length, no income is recognized until the transferee either exercises the option or disposes of it in an arm's-length transaction. At that point, the transferor (the service provider) is deemed to recognize taxable income. If the transferee exercises the option, the transferor's taxable income would be the excess of the FMV of the stock received over the exercise price. The transferee does not incur an income tax liability as a result of exercise, even though the transferee's basis in the stock would be its FMV at the time of exercise. The transferee's holding period for the stock commences on the option's exercise date. Similarly, if the transferee disposes of the option in an arm's-length transaction, the transferor (service provider) would recognize taxable income equal to the amount or FMV of the consideration received by the transferee.

Gift Tax Consequences

The gift of nonqualified, compensatory stock options to children and grandchildren, either outright or in trust, constitutes an attractive estate planning technique. Prior to Rev. Rul. 98-21, most tax practitioners believed that such gifts had the following favorable consequences:

1. The transfer of the options to family members did not cause the recognition of taxable income. The transfer via gift is a non-arm's-length transfer governed by the above income tax rules. This result is not challenged under Rev. Rul. 98-21.

2. If the family member to whom the options are transferred subsequently exercises the options, the transferor (or, if the transferor is not then living, his estate) will be deemed to receive taxable income as described above. Rev. Rul. 98-21 does not challenge this either. The payment of income tax by the transferor does not constitute a taxable gift, even though the economic value inures to the transferee's benefit. This income tax payment reduces the amount of the transferor's estate eventually subject to estate tax. It appears that the Service is not challenging this result.

3. The transfer of the options to a family member constitutes a completed gift for gift tax purposes. The option's value at the date of the gift needs to be determined, even though the options are not deemed to have a readily ascertainable value for income tax purposes. This gift tax value is determined using a generally recognizable option-pricing model (e.g., the Black-Scholes option pricing formula). The special valuation rules applicable in the case of transfers of certain interests in corporations would not apply. The transferor may be able to avoid current gift tax liability by using available annual per-donee exclusions and the unified credit. Once the gift is complete, no additional gift tax liability would arise on exercise (or disposition) of the options by the transferee; neither the stock options nor the stock obtained on exercise would be includable in the transferor's estate.

In Rev. Rul. 98-21, the IRS attacked the gift tax consequences noted above in the third item. In this ruling, Company granted to A nonstatutory, compensatory options to purchase shares of Company common stock. However, A could exercise the options only after he performs additional services. All options granted under the plan expire 10 years from the grant date. The exercise price per share is the FMV on the grant date. The plan permits the transfer of the options to a member of the optionee's family (or to a trust for the benefit of family members). A transferred his options to his children as a gift. As a result of this transfer, after A performs the required additional services (and before the expiration date), the children can determine whether and when to exercise the options, and on exercise they will be obligated to pay the exercise price.

The Service recognized that for gift tax purposes, the term "property" is extremely broad and includes "every species of right or interest protected by law and having an exchangeable value." However, a gift is complete only when the donor has so parted with dominion and control over the property as to divest himself of the power to change its disposition. Thus, the IRS concluded:

In the present case, Company grants to A a nonstatutory option conditioned on the performance of additional services by A. If A fails to perform the services, the option cannot be exercised. Therefore, before A performs the services, the rights that A possesses in the stock option have not acquired the character of enforceable property rights susceptible of transfer for federal gift tax purposes. A can make a gift of the stock option to B [his children] for federal gift tax purposes only after A has completed the additional required services because only upon completion of the services does the right to exercise the option become binding and enforceable.

Of course, by the time A completes the additional services, it is likely that Company's stock price will have risen, causing the amount of the gift to be substantial.

In support of its conclusion, the Service cited two authorities involving promises to make transfers if the intended transferee would either get married or graduate from college. These authorities held that there was no completed gift until the transferee performed additional services, at which time the promise would become legally enforceable. However, in the case of a compensatory stock option, the legal rights are created between the

employer and employee at the time of grant, rather than between the donor and donee.

The possibility that the employee will terminate employment before the options vest is a factor to be considered in valuing the options, but it should not preclude the gift from being complete. There are several authorities recognizing that the possibility an employee will terminate employment because of retirement, disability, voluntary resignation, etc., should be considered an act of independent significance (i.e., a condition subsequent), so that such a possibility is not a power to change the disposition of the transferred property. For example, in Rev. Rul. 72-307, the IRS held that the power to cancel a group-term life insurance policy solely by terminating employment was not an incident of ownership causing the policy to be included in the insured's gross estate; Rev. Rul. 84-130 and Estate of Smead, 78 TC 43 (1982), reached similar conclusions. Moreover, the Service has recognized that a completed gift can occur despite the fact that the property right is subject to a contingency such that the donee may not obtain possession or enjoyment of the property; see Rev. Rul. 79-238, in which a contractual arrangement by which one sibling promised to transfer property to another sibling's children in the event the latter sibling predeceased the life tenant of a trust was held to be a completed gift at the time the contract was entered into.

In a compensatory option situation, the grant of an option gives the employee the legally enforceable right to exercise it at his discretion, if the employee does what he is normally expected to do-i.e., remain with the employer for a specified period of time. The ability to exercise usually matures by the mere passage of time, because it would be against the employee's selfinterest to voluntarily terminate his employment. (Other causes of termination are generally beyond the employee's control.) Certainly the employee, the employer and the investment community believe that the employee is being given a property right at the time of grant. Thus, economic compulsion, normal expectations, the employee's self-interest and the existence of a legally enforceable option (even though not presently exercisable) should enable an employee to make a completed gift of a nonqualified, compensatory option without being taxed at a future date on the future value of the gift.

The IRS's issuance of Rev. Rul. 9821 casts substantial doubt on the ability of a taxpayer to make a completed gift of compensatory options that are not presently exercisable. The inability to be certain of the gift tax consequences of such a gift will undoubtedly deter many taxpayers from using this technique. Moreover, it remains to be seen whether or not the Service will apply its theory to gifts made prior to the issuance of the ruling.

ABSTRACT: Estate-planning consultants agree that a perfect gift is one that has little current value but has huge potential value, and incurs little or no cost at the time it was given while ensuring that all future appreciation happens outside the estate. Therefore, a compensatory stock option can be the best gift that senior executives can give to their children. It has miniscule value at the time it is granted but can become significantly valuable as the price of the stocks becomes higher. To make such a gift to their heirs, executives can employ a technique called Executive Option Transfer. It is touted as a powerful tool for transferring wealth to future generations. The mechanics of this method are described.

TEXT:

If you asked your children for their idea of the perfect gift, you probably would hear answers such as a new car, the clown payment on a house, or a trip to the South of France next summer. If you asked your financial advisor's input, on the other hand, he or she likely would respond from an estate-planning perspective. To them, the perfect gift is one with little current value but large potential value. It is also one that would incur little or no ("gift tax") cost today, while allowing all future appreciation to take place outside your estate.

For a senior executive, the asset that best fits this description may well be a compensatory stock option. By its definition, an option to buy stock has little value at the time it's granted but has the potential to be exceptionally valuable as the stock price increases. There are a number of advantages to making such a gift to your heirs using a technique known as Executive Option Transfer.

Here's how it works: At the time you are granted a stock option, you gift the option directly to your heirs or to a trust for their benefit. The option has little value at this point, because the exercise price is usually equal to the fair market value on the date of grant. Once the gift value is determined - using a quantitative valuation model to value publicly traded stock options - discounts can be taken from this fair market value number, relying on the principles of illiquidity and lack of marketability, to further reduce the gift tax value. You then pay the gift tax or use part of your annual exclusion (\$10,000 per donee) or lifetime estate and gift tax exclusion (\$600,000).

At some future date, when the option has appreciated in value, your heirs or trustees for the benefit of heirs, exercise the stock option. The entire proceeds pass to your heirs free of further estate and gift taxes. However, at the time of exercise, you are required to pay the income tax on the option spread, just as you would pay the tax if you had not transferred the options but had simply exercised them in your own name. This clearly needs to be considered in terms of cash flow, as the option proceeds will not be available to help fund the tax liability. The key here, however, is that this payment of the income tax is not considered (TABULAR DATA OMITTED) a taxable gift to your children.

The chart above illustrates the power of this technique. You are granted 10,000 options at \$30 per share. They are later exercised at \$60 per share. If you exercised the options, paid the income tax, and passed the reinvested proceeds on to your heirs 20 years after exercise, you would leave them \$197,000 after estate taxes. With the Executive Option Transfer technique, the amount you pass to your heirs increases to \$612,000. The benefit comes from the future appreciation on the option and the reinvested option proceeds, plus the fact that your heirs do not pay the income tax on the option exercise.

While this is clearly a powerful technique for passing on wealth to

future generations, there are a few potential drawbacks:

- * Your company stock-option plan probably states that your options are nontransferable. The plan will need to be amended to permit "limited" transfers to family members or to a trust for the benefit of family members. At minimum, this change probably will need board of directors' approval.

- * The executive must cede control over the timing of exercise and over resulting proceeds once the options are transferred. From a tax standpoint, the transfer must be irrevocable for it to be a completed gift.

- * If the stock does not appreciate in value, you may have used part of your estate tax exclusions and/or paid gift tax with no benefit to your heirs.

- * There are legal fees, trustee fees (if a trust is utilized), and stock - option valuation fees associated with an option transfer.

- * This technique works only with non-qualified or non-statutory options. Incentive stock options are not transferable under the tax laws.

- * The IRS could audit your gift tax return at time of transfer, and valuation of compensatory stock options has no real precedent in the tax law.

- * The exercised option stock may need to be held for two years after exercise, depending upon the type of SEC registration utilized.

- * The IRS has looked favorably on the technique in recent times. But the tax aspects of this transaction are not risk-free, which means the IRS could change its interpretation of the law in the future or challenge the transfer if the gift is not properly structured.

Nevertheless, while not a convertible car or waterfront mansion, an Executive Option Transfer makes the "perfect gift" - one equally satisfactory to giver and receiver.

Estimation method and system for complex securities, and portfolio structuring, using low-discrepancy deterministic sequences
Schatzungsverfahren und System für komplexe Wertpapiere und Strukturierung von Portfolios mit Hilfe von deterministischen Folgen mit niedriger Diskrepanz

Methode d'estimation et système pour des titres en action et pour structurer des portefeuilles en utilisant des séquences déterministiques ayant une faible disparité

Claims

Detailed Description

... and coincident therewith, transacting the associated one or more fees.

In some variations, the intellectual **property** services include **paying** an **annuity** or maintenance fee, making an intellectual **property** filing on behalf of the **user**, or preparing target jurisdiction- and associate-specific form documents. In some variations, the fee transacting...

...fee payments, initiating performance of the selected fee payments, and coincident therewith, initiating an associated **payment** transaction between the **user** and an intellectual **property annuity**, maintenance or renewal fee **payment** service.

In still another embodiment in accordance with the present invention, a method of operating...regional and national offices either directly or (if required) using a designated agent. Accordingly, intellectual **property annuity** portal 410 may supply workstation 421 with a rather extensive listing of **payment** types, target jurisdictions and associates for presentation to the **user**.

Possible selections may be presented to the **user** using any suitable **user** interface technology.

- 14 In some realizations, intellectual **property annuity** portal 410 initially supplies or otherwise provides access to additional information that may facilitate **annuity payment** decisions. For example, intellectual **property annuity** portal 410 may initially supply (403) fee and/or cost information descriptive of current fee...authorizations, etc. In some realizations, fees are transacted at least in part by debiting a **user**'s deposit account or accounts with the intellectual **property annuity** portal organization and/or with a particular target jurisdiction or associate. In some realizations, **payment** systems may include target jurisdictions and/or associates and payments to particular target jurisdictions and...specific requirements and fee data may vary from associate to associate.

FIG. 5 illustrates exemplary **user**-side application data and control flows in an intellectual **property annuity payment** configuration in accordance with an embodiment of the present invention. Specifically, after initiating a session...

...application retrieves information from docket database 523 to provide a set of payments which the **user** may select for execution. Using information from intellectual **property annuity** portal 510 that identifies supported target jurisdictions and **payment** types, - 16 the **user** selects a subset of items for payment. If required, the **user**-side application requires the user to select from supported associates to act as in-country...

...the originating filer side application requests corresponding fee quotations. If the fees quoted by intellectual **property annuity** portal 510 are approved, a fee transaction between **user** and intellectual **property annuity** portal 510 is authorized (e.g., by debit account, wire **transfer**, etc.) and the selected **payment** (s) is (are) initiated. If not, the **user** may alter his selection of items for **payment**.

Optionally, the intellectual **property annuity** portal 510 sends, and the **user**-side application receives, any jurisdiction- and associate-specific forms (e.g., power of attorney forms...

...5 Assuming that fees are approved and that the fee transaction is successful, the intellectual **property annuity** portal 510 sends, and the **user**-side application receives, invoices and **payment** confirmations. As before, invoices and **payment** confirmations are preferably encoded in computer readable form and transmitted electronically by intellectual **property annuity** portal 510. Electronic **payment** confirmations are used by intellectual **property annuity** portal 510 to update docket system 523. Similarly, electronic invoices

INTL CLASS: G06F-017/60

ABSTRACT

PROBLEM TO BE SOLVED: To unnecessitate the installation of a special purpose company and to fluidize the assets of an originator without a legal obligation to pay taxes .

SOLUTION: An originator 1, which has the assets such as credit and desires to fluidize this assets and to encash it, entrusts the owned assets to a trust company 2 (1). The trust company 2, which receives the trust of the assets, applies a trust beneficiary right corresponding to the received assets to the originator 1 (2). On the basis of the entrusted assets, the trust company 2 accepts non-recourse loan from an investor 4 (3). Then, the thrust company 2 transfers the money lent from this investor 4 to the originator 1 as capital redemption based on the thrust beneficiary right (4). Besides, the trust company 2 restores one part of benefit obtained by cash flow to the investor as interest (5).

INTL CLASS: G06F-017/60

ABSTRACT

PROBLEM TO BE SOLVED: To provide a system for transferring the right of a lease contractor to buy a leasing object at a set residual price, to a third person .

SOLUTION: The contents of a call option having at least information for specifying the leasing object and information by which the set residual price and a lease finishing date can be confirmed are obtained and registered in a database. Furthermore, the selling price of the call option registered in the database is obtained and registered assigned to the call option . Then, the contents of the call option registered

in the database and its buying price are presented to an applicant for purchase.

INTL CLASS: **G06F-017/60**

ABSTRACT

PROBLEM TO BE SOLVED: To solve the problem that it is difficult to give a sufficient incentive to, for example, an agent having made a franchise contract since a conventional **stock option** is limited to the executives and employees of a company issuing shares and the employees of subsidiary companies of the company but not applicable to the agent and also quick response can not be expected because of its strict procedure.

SOLUTION: Shares are rented on special condition that a union called a **stock option** group is established and may sell the shares by paying a certain amount of money from a large stockholder. The group consists of **members** to be given an incentive and the **members** are given the option right to sell a certain number of shares or buy shares by a certain amount. **Member** information, the special contract, and the agreement of the group are stored; when a **member** makes a request to use the option right to sell shares, it is decided whether or not the shares may be sold according to the stored **member** information, special contract, and agreement, the shares are sold by the group, and part or the whole of the selling profit corresponding to the sold shares is distributed to the **members**.

INSTITUTION AND SYSTEM FOR PROGRESSIVE INDIRECT **TAX** AND RELATIVE CURRENCY

PUB. NO.: 2000-306033 [JP 2000306033 A]
PUBLISHED: November 02, 2000 (20001102)
INVENTOR(s): OOHASHIRA KOTARO
APPLICANT(s): OOHASHIRA KOTARO
APPL. NO.: 11-154225 [JP 99154225]
FILED: April 21, 1999 (19990421)
INTL CLASS: G06F-019/00; **G06F-017/60**

ABSTRACT

PROBLEM TO BE SOLVED: To impart progressive aspect to a value-added **tax**, namely, an excise **tax**.

SOLUTION: Yore specifically, a personal deposit account in a **financial** institution is separated into a property oriented account and an account exclusive to drawings, virtual current equal to a fixed rate of liquid assets such as personal deposit or stock and equivalent to cash is set and

it is called relative currency. The account exclusive to drawing is defined as an account for the relative currency and a central bank or exclusive operating institution to **trust** the operation of the relative currency is established. When property is moved from the property oriented account through the exclusive operating institution to the account exclusive to drawings, a positive or negative premium is generated between the central bank or exclusive operating institution. Namely, a person having property more than a certain fixed quantity **pays** a premium and a person having property less than it receives a premium. This is the institution of relative currency and a progressive excise **tax** for eliminating the premium to be paid to the poor and absorbing it to the National Treasury as a **tax**.

PUB. NO.: 11-096275 [JP 11096275 A]
PUBLISHED: April 09, 1999 (19990409)
INVENTOR(s): TSUDA HIROMICHI
APPLICANT(s): FUJI SHINTAKU GINKOU KK
APPL. NO.: 10-208899 [JP 98208899]
FILED: July 24, 1998 (19980724)
PRIORITY: 09198295 [JP 979198295], JP (Japan), July 24, 1997 (19970724)
INTL CLASS: G06F-019/00; G06F-017/60

ABSTRACT

PROBLEM TO BE SOLVED: To reduce the costs of stamp **tax** charge, issue business, or the like, and to make it possible to surely receive prices before a settlement date by checking an amount **transferred** from a **payer** on the settlement day and a set money **trust** and **transferring** the amount to each client based on the details of the **trust** in each client.

SOLUTION: Receiving processing for credit sales claim data sent from a **payer** is executed (a). Only data matched with a data receiving schedule out of the received data are registered. After the data receiving processing, the contents of the received data are transmitted to the **payer** through a facsimile(FAX) as a detailed statement of a **trust** claim (b). A **trust** is set up in each data reception. Consequently beneficiary right **transfer** and **transfer** to a third person can be attained. After setting up the **trust**, following documents are transmitted to the **payer**, the client and a 2nd beneficiary through the FAX (c), (d). Namely a **trust** claim detailed balance sheet is transmitted to the client through the FAX in each setting of a **trust**. A **trust** beneficiary right detailed balanced sheet and a period-sorted **payment** schedule are respectively transmitted to the 2nd beneficiary and the **payer** through the FAX in each setting of a **trust**.

Abstract (Basic): WO 200239644 A2

NOVELTY - Money that was paid to a policy, 312, uses money, 316, borrowed from a third party, 318, against the policy, that has multiple **annuities**, 302, and that may require a **trust**, 314, or business entity to conduct the transaction. If a sufficient pool of **annuities** and loans, 316, was accumulated, the need for a specific **annuity** being tied to a specific policy could be eliminated. Income **tax** is reduced as the **annuity** portion is built into the policy and the resulting death benefits, 320,323, are also nontaxable.

DETAILED DESCRIPTION - AN INDEPENDENT CLAIM is included for a method of combining life insurance and **annuities**.

USE - Administering life insurance policies using **annuities** for **funding**.

ADVANTAGE - Providing substantial **tax** advantages.

DESCRIPTION OF DRAWING(S) - The drawing is a flow chart of the method.

Abstract (Basic): JP 2001306813 A

NOVELTY - A database registers the previous price of each **financial** product for every date. The purchasing current-price status and sale current-price status of the **financial** product are specified from the database based on the purchasing and sale information received on a unit purchasing date and a sale day. A profit amount is computed from the specified purchasing and sale current-price status, and is provided to a user.

USE - Applicable for **financial** product e.g. debenture, investment trust, national bond on internet.

ADVANTAGE - Enables simple and correct understanding of profit and loss amount of **financial** product by the purchaser of **fund**. Obtains exact purchase price of **financial** product before change of taxation. Simplifies understanding of exact amount of **tax** for purchasing of **financial** product.

DESCRIPTION OF DRAWING(S) - The figure shows the flowchart for processing operation of computer server. (Drawing includes non-English language text).

NOVELTY - The data regarding deposit or withdrawal of customer in **financial** institution, is transmitted to accounts management center. The classification data is generated from received data in management center. The classification data is converted to document data, and transmitted to customer and accounts office terminals (4,3).

USE - For automatic accounting in taxation business accounts office of licensed **tax** accountant or certified public accountant. For accounting in bank, **trust** association, post office.

ADVANTAGE - Simplifies data entry required to execute **payment** to other **financial** institution account. Facilitates easy production of cash schedule in bank. Enables reception of various information services by accounts office from internet.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of the accounts management server. (Drawing includes non-English language text).

Abstract (Basic): EP 1143369 A2

NOVELTY - A web browser accesses and displays information screen with specific detailed information on various **financial** products and including programmed links operable to cause the display of a subsequent information screen. Programmed links are arranged so that it is only operable and permits display of a subsequent information screen to which it links, once a specific other link and information screen has been displayed.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(a) Method of consolidating and providing **financial** product information;

(b) Method of controlling access to two classes of information relating to **financial** products

USE - For providing **financial** product information including information about cash savings accounts, equity investments, life assurance unit **trust** pensions and **tax** free investments to **financial** institutions, to intermediaries and to customers.

ADVANTAGE - Provides **financial** product information to user and to customer in a structured way which is determined and controlled by the arrangement of information screens. Hence, vast amount of information can be accessed and displayed in a convenient and more comprehensible manner. The user is able to obtain easily the information and level of detail which they require without having to sift through unwanted information.

DESCRIPTION OF DRAWING(S) - The figure shows the flowchart of operation of providing **financial** product information.

CIP of application US 9873027
CIP of patent US 6202052

Abstract (Basic): US 20010037268 A1

NOVELTY - A tax information requestor is connected to an
electronic intermediary and to a tax data provider. Tax returns and
tax data of a tax payer are collected from the electronic
intermediary and the tax data provider.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the
following:

- (a) Tax information collection apparatus for collecting tax
information by tax information requestor;
- (b) Computer-readable medium storing tax information collection
program, collected by tax information requestor;
- (c) Tax information collection method for collecting tax
information by tax information distributor;
- (d) Tax information collection apparatus for collecting tax
information by tax information distributor;
- (e) Computer program for storing tax information collection
program, collected by tax information distributor

USE - For automated tax reporting, payment and refund to
compute liabilities of tax payers such as individuals, trust,
estate, corporation or partnership based on the amount of donations
made to charitable organizations.

ADVANTAGE - Eliminates inconvenience associated with filing of
federal, state, local and foreign income-tax returns. Reduces error
and cost associated with the filing of tax returns. Eliminates the
need for hard copies of all intermediate tax reporting forms and
hence saves paper, time and cost.

DESCRIPTION OF DRAWING(S) - The figure shows the flowchart
explaining the tax information collection method.

Abstract (Basic): JP 2001256352 A

NOVELTY - The information about **stock options** for each **person** stock sale value and stockholder related details are stored in memory (11). A stock trading indicator indicates the stock trading condition based on the information stored in the memory and the stock information are updated accordingly.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for stock management method.

USE - For managing **stock options** in company.

ADVANTAGE - Incentive is given to the **person** without capital relationship, as stock information is updated based on indicated trading condition.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of stock management system. (Drawing includes non-English language text).

Abstract (Basic): WO 200152097 A2

NOVELTY - An amount from general **trust** account is paid to identified initial owner of intellectual property, due to **transfer** of intellectual property to subsequent owner. Payments from initial owner are obtained as license to use intellectual property and allocated to general **trust** account.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(a) Data processing system;

(b) **Financial** transaction management method

USE - For repeated securitization of intellectual properties in real estate business.

ADVANTAGE - Since **tax** treatment of sale and predictable future **payment** are provided, ready valuation of current value of security at any time is permitted. Permits collection of investments from multiple investors, by continuously evaluating real time value of underlying intellectual property assets.

DESCRIPTION OF DRAWING(S) - The figure shows the flowchart explaining the intellectual property securitizing processes involved.

US 20010056391 A1 G06F-017/60 Provisional application US 2000176032

Abstract (Basic): WO 200152169 A1

NOVELTY - Method consists in receiving an option-exercising scenario for a **stock option** grant, calculating an estimate for the scenario, comparing the estimate with an estimate based on a standard strategy option-exercising scenario, and calculating the optimal strategy to maximise the value of the grant based on the estimates. Access is granted to the **stock option** management system via communications network and the information includes stock identification, grant date, total number of shares, vesting schedule, option price and expiration date. The future price curve is calculated for the stock based on historical returns, estimated future price etc.

DETAILED DESCRIPTION - There are INDEPENDENT CLAIMS for (1) a program, (2) an apparatus for optimizing the value of **stock option** grants.

USE - Method is for companies granting **stock options** to hire and retain employees.

ADVANTAGE - Method enables **users** to see the value of employee **stock option** grants in real-time, suggests optimization strategies and enables access to detailed e.g. tax resources.

DESCRIPTION OF DRAWING(S) - The figure shows a flow diagram of the method.

US 20010011223	A1		12	G06F-017/60	

Abstract (Basic): US 20010011223 A1

NOVELTY - The owner entity provides one or more periodic payments determined from the received taxable sum of money and **person 's** life expectancy, to the **person** until the **person** dies. A money lender (18) loans a non-taxable sum of money and receives one or more periodic interests from the **person** . An insurer (16) provides a life insurance policy for **person 's** life such that the policy pays a death benefit.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(a) Method for providing an executive compensation system;

(b) Computer program

USE - For providing pension plans, non-qualified agreements and stock option plans to retiring executive, officer or director of a business.

ADVANTAGE - Provides more income to executive and reduces cost to buyer while simultaneously increasing the after tax value of sale to business owner.

DESCRIPTION OF DRAWING(S) - The figure shows the flowchart of functions of various entities during set-up of an executive compensation system.

Abstract (Basic): WO 200111518 A2

NOVELTY - The system (100) designates barter value of primary class items to be bartered and the link (104) **transfers** the orders to database (116). The designating unit designates secondary class items and items are displayed via Internet connectivity (110) after designating barter value. A matching engine (118) matches the barterer's barter order with the selected posted order for effectuating barter transaction.

DETAILED DESCRIPTION - Barter ordering module creates the barter orders and designates primary class of items to be bartered. An INDEPENDENT CLAIM is also included for method of bartering.

USE - For implementing barterers between several parties with classes of item, for exchanging or selling stock, cash, dollars, CD's, bonds, notes, commodities, **annuities**, government bonds, etc.

ADVANTAGE - Actuates a **tax** free exchange or **tax** deferred exchange for swapping barter items.

DESCRIPTION OF DRAWING(S) - The figure shows the bartering system.

Abstract (Basic): US 6064983 A

NOVELTY - A converter (356) converts and presents **tax** related **financial** contract data. The database (357) stores the **tax** related **financial** contract data output by the converter. A predefined message is transmitted from the converter to the **tax** server (366) which has **tax** processing logic to provide generic **tax** computation. Client uniformly invokes the **tax** processing logic on the **tax** server.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for computer implemented **tax** legislation method.

USE - In commission and accounting system for analyzing taxable aspects of **financial** contracts such as life insurance policies, **annuities** in insurance companies.

ADVANTAGE - Providing the **tax** server with a generic message allows it to be used by many other system, hence it is not specific to any one application. Processing of commission and accounting system is facilitated as it is dependent on the primary administrative processing.

DESCRIPTION OF DRAWING(S) - The figure shows the strategic **tax** subsystem architecture.

Patent No Kind Lan Pg Main IPC Filing Notes

CA 2254378 A1 E 36 G06F-017/60

Abstract (Basic): CA 2254378 A1

NOVELTY - The card transaction system, with purchase rebate consists a charity (56), a **foundation** (50), a cardholder (12) and a merchant (16). When a merchant carries out a **financial** transaction

for a purchase with a cardholder, a rebate of the product price is generated. The cardholder then selects a charity that has been pre-approved by a **foundation**, to receive the rebate. All information concerning the transaction is stored on a database (64).

DETAILED DESCRIPTION - The charge settlement operation that provides the rebate for the charity, also provides a **tax** deduction for the cardholder.

An INDEPENDENT CLAIM is included for a method of **transferring** a purchase rebate to charity.

USE - For providing a charity contribution whilst purchasing goods.

ADVANTAGE - Allows a cardholder to purchase goods at normal retail prices, but contribute to a charity organization at the same time. Additionally, by doing this, the cardholder receives a **tax** deduction on the value of the goods.

DESCRIPTION OF DRAWING(S) - The figure shows an overview of the process steps related to the card transaction system.

Cardholder (12)

Merchant (16)

Foundation (50)

Charity (56)

Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
US 5946668	A	12	G06F-017/60	

Abstract (Basic): US 5946668 A

NOVELTY - Amount of earnings to withhold from income including income **tax** for next fiscal year and for home mortgage interest deductions are calculated. Amount of **tax** refund to deposit into a **trust fund** during selected period and **trust fund** after deposit, are calculated. Mortgage based on the amortization of home mortgage is issued.

DETAILED DESCRIPTION - Mortgage data, income data and income **tax** data are entered into memory. Amortization of home mortgage over a selected period, income **tax** refund for a prior fiscal year and income **tax** for current fiscal year are calculated.

USE - For determining home mortgage payments to **pay** for home throughout predetermined period for low income families.

ADVANTAGE - Facilitates reflection of unexpected changes in the borrower information, cost of living estimates, income and home appreciation, and changes in **tax** rates. Maintains ability to gain access to significant amount of cash for future need.

DESCRIPTION OF DRAWING(S) - The figure illustrates the flow chart
for home mortgage **payment** determining method.

Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
JP 8335293	A		11	G07G-001/12	

Abstract (Basic): JP 8335293 A

The system uses a **trust** inquiry machine (A) which makes a **taxi**
car store an invalid card number information. A computer (C) for data
management is set in the office. A copy of invalid card number
information from the computer is sent to the **trust** inquiry machine.

An IC card (B) which is inserted into the computer **transfers**
contents of transactions from a credit card (D) to the computer through
the **trust** inquiry machine.

USE/ADVANTAGE - For reservation of ticket in railway, passport in
aeroplane, room in hotel. Allows remote shopping while travelling suing
in-vehicle unit providing goods details. Ensures protection to reading
and writing of IC card. Simplifies management of credit card.

Jin says decision on employee stock ownership play imminent
SOUTH KOREA: NEW EMPLOYEE **STOCK OPTION** SCHEME
The Korea Herald (XBF) 31 May 2001 Online
Language: ENGLISH

The South Korean government is considering to introduce a new employee **stock option** scheme following the style in the US. The new scheme is known as the employee stock ownership plan (ESOP). Companies participating in ESOP will create a **trust** fund to finance share buy-backs. Shares bought back will then be offered to employees. In conjunction with ESOP, the government may also amend relevant legislation to provide **tax** benefits for firms participating in ESOP.
